

## About the hospital

Yaroslavl Regional Clinical Hospital for War Veterans - The International Center for the Elderly "Healthy Longevity" was created in accordance with the Civil Code of the Russian Federation, the Budget Code of the Russian Federation, Federal Law of January 12, 1996 No. 7-FZ "On Non-Profit Organizations" in February 1946 years on the basis of the order of the Yaroslavl Department of Health.

Today, the hospital is a multidisciplinary specialized medical institution for the provision of inpatient and outpatient care, including high-tech, to veterans of the Great Patriotic War, the war in Afghanistan, invalids of the army, combatants in Chechnya, survivors of the siege of Leningrad, rehabilitated political prisoners, veterans the rear, awarded orders and medals, former prisoners of concentration camps. It is an organizational, methodological and diagnostic center in the work on medical support of war veterans and persons equated to them on benefits.

For 11 months of 2019, 22878 people turned to doctors - specialists of the outpatient clinic service of the hospital, 6439 were treated in the hospital. Admission is carried out in 14 profiles (general practitioner, endocrinologist, ophthalmologist, neurologist, CFD doctor, surgeon, radiologist, endoscopist, ultrasound doctor, doctor orthopedic traumatologist, urologist, otolaryngologist, dentist). The preferential category of veterans who applied to outpatient services amounted to 73.5% of all who received advisory outpatient care. All doctors of the outpatient clinic service of the hospital regularly participate in field work in the medical and preventive institutions of the region with the aim of providing advisory assistance to veterans of the municipal regions of nuclear weapons. In 2018, 8 trips were made to the medical facilities of the MR Nuclear Forces, 191 patients were consulted.

Doctors of the Health Center held 54 field events at which 2579 people were examined and consulted. Of them:

1. Within the framework of the "Welcome to the Village" campaign, 5 trips were conducted, 177 people were examined.
2. "Healthy future teachers" - 28 visits, 1469 people were examined.
3. In the framework of the campaign "Healthy Environments" - 21 trips, 993 people were examined.

Hospital hospital fund - 211 beds: 30 beds - orthopedics and traumatology, 20 - medical rehabilitation according to the profile of orthopedics, 25 beds - medical rehabilitation according to the profile of neurology, 30 beds - neurology, 6 beds - department of anesthesiology and rehabilitation, 20 beds - surgical department, 60 beds - cardiology department and 20 ophthalmological beds.

In 2019, the hospital treated 5740 patients, performed 3138 surgical interventions. A total of 2747 patients were operated on, including 2188 patients, and highly specialized surgical care was received to the privileged category of veterans. In 2019, 1,112 operations were carried out on VMP. Including foreign citizens - 10 people.

The total number of patients who received inpatient medical care belonging to the category of veterans according to the Federal Law "On Veterans" is 4837 people. - 74.6% of those discharged in 2018, including 3819 patients, including labor veterans.

The introduction of modern medical and preventive technologies, an increase in the volume of measures aimed at creating a healthy lifestyle among citizens of the Yaroslavl region, is a priority in the work of the hospital.
